List of Figures	vii
List of Tables	xiii
Preface.....	xv
Acknowledgments	xvii
Introduction	xix
Editors.....	xxiii
Contributors.....	xxv
Nomenclature	xxvii
1 LRFD Method of Bridge Design	1
Limit States	1
Load Combinations and Load Factors.....	3
Strength Limit States for Superstructure Design.....	6
Resistance Factors, Φ , for Strength Limits.....	6
Design Live Load HL-93	7
Fatigue Live Load	7
Number of Design Lanes, N_L	9
Multiple Presence Factor of Live Load, m	9
Dynamic Load Allowance, IM	10
Live Load Distribution Factors	10
Load Combinations for the Strength I Limit State.....	11
Simple Beam Live Load Moments and Shears Carrying Moving Concentrated Loads per Lane	13
Live Load Moments and Shears for Beams (Girders)	13
2 Design Examples.....	17
Design Example 1: Reinforced Concrete T-Beam Bridge	17
Design Example 2: Load Rating of Reinforced Concrete T-Beam by the Load and Resistance Factor Rating (LRFR) Method.....	61
Design Example 3: Composite Steel–Concrete Bridge	74
Design Example 4: Longitudinal Steel Girder	118
Design Example 5: Reinforced Concrete Slabs	144
Design Example 6: Prestressed Interior Concrete Girder	164
Design Example 7: Flexural and Transverse Reinforcement for 50 ft Reinforced Concrete Girder.....	183
Design Example 8: Determination of Load Effects Due to Wind Loads, Braking Force, Temperature Changes, and Earthquake Loads Acting on an Abutment.....	201

3 Practice Problems..... 215
Practice Problem 1: Noncomposite 60 ft Steel Beam Bridge for
Limit States Strength I, Fatigue II, and Service 215
Practice Problem 2: 161 ft Steel I-Beam Bridge with Concrete Slab 244
Practice Problem 3: Interior Prestressed Concrete I-Beam 263

**Appendix A: Distribution of Live Loads per Lane for Moment
in Interior Beams (AASHTO Table 4.6.2.2.2b-1) 287**

**Appendix B: Distribution of Live Loads per Lane for
Moment in Exterior Longitudinal Beams
(AASHTO Table 4.6.2.2.2d-1) 291**

**Appendix C: Distribution of Live Load per Lane for Shear
in Interior Beams (AASHTO Table 4.6.2.2.3a-1) 295**

**Appendix D: Distribution of Live Load per Lane for Shear
in Exterior Beams (AASHTO Table 4.6.2.2.3b-1)..... 299**

Appendix E: U.S. Customary Units and Their SI Equivalents..... 303
